Side Elevation Plot 9
Flank Elevation

The side elevation shows the proposed house in relation to the approved house. In side profile the proposed house has less height and bulk than the approved house. It is relevant to note that the current house has a flat roof over the garage were as the approved scheme has a pitched roof. In addition the approved house has a gable end wall, where as the approved house has a hipped roof.

The above photograph shows the flank wall of the neighbouring property in Cottage Close the two first floor windows are obscurely glazed.
